REACH profiles

●
Your profile

Your REACH
Rating: 3.50

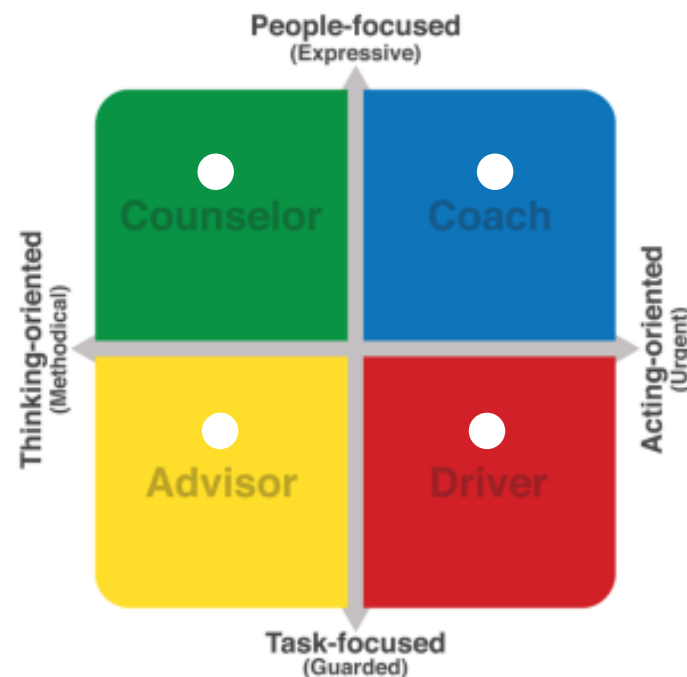

STYLE MARKERS:

-  Communicating with a reserved, formal style
-  Conflict-handling by identifying compromises
-  Delegating by 'teaching' the suggested approach
-  Planning through methodical, detailed preparation
-  Learning with careful, step-by-step reflection

Generally Recognised as:

- ☐ Detail-minded, analytical and critical
- ☐ Task focused
- ☐ Objective and rational
- ☐ Offers measured and focused effort
- ☐ Concerned for accuracy and efficiency
- ☐ Rule conscious
- ☐ Focused on practicality
- ☐ Consistent and reliable in decision-making
- ☐ Self-reliant and Independent
- ☐ Formal and professional in demeanour

Your Style

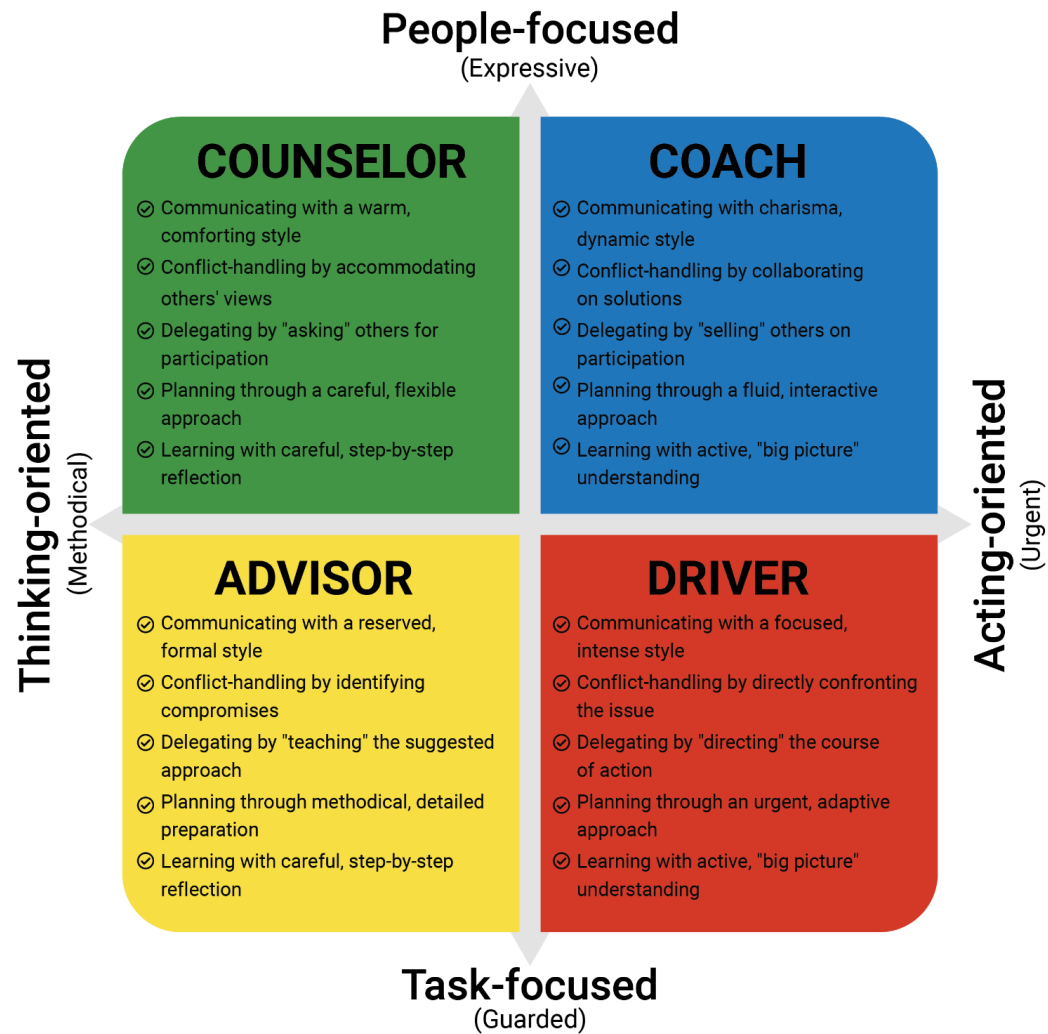

STYLE MARKERS:

-  Communicating with a focused, intense style
-  Conflict-handling by directly confronting the issue
-  Delegating by 'directing' the course of action
-  Planning through an urgent, adaptive approach
-  Learning with active, 'big picture' understanding

Generally Recognised as:

- ☐ Self-reliant / Independent
- ☐ Risk tolerant
- ☐ Focused on goal accomplishment
- ☐ Motivated by a fast-paced environment
- ☐ Objective and rational in decision making
- ☐ Flexible in trying new approaches
- ☐ Adapts quickly to changing circumstances
- ☐ Formal and professional in demeanour
- ☐ Frustrated when they encounter obstacles

Time Management

Assessment: What's Your Personal Productivity Style?

The Prioritizer

Characteristics: Logical, analytical, fact-oriented, realistic, efficient

The Prioritizer is a highly efficient worker who moves with decisiveness. Built with a keen sense of what matters most, the Prioritizer can zero in on the primary task and complete large amounts of work in a short span of time. They're laser-focused on outcomes and love to dive deep into the data. Walk into their office, and you're likely to find a professional setup that is functional, clean, and free of excessive decorations.

Strengths:

Determining the level of importance of each task and project

Analyzing and solving problems

Goal-oriented, consistent, decisive

Blind spots:

Tendency to be controlling and rigid

Excessive competitiveness

Valuing speed over excellence

Focusing on project over process

Communication style: Always focused on doing work quickly and effectively, the Prioritizer would rather skip the chit-chat—just give them the facts. Never one to overshare personal information, they may keep conversations short, and even their emails typically contain only a few sentences. The Prioritizer can give and receive feedback without any emotion attached to it.

Because they focus on data, Prioritizers tend to ask '**what**' questions: What are the facts? What's the bottom line? What is the margin of error?

The Planner

Characteristics: Organized, detail-oriented, conscientious, punctual

The Planner has a penchant for schedules, list-making, and deadlines (which they never miss!). As such, they're excellent project managers. When planning any project, they're particularly conscientious about sticking to the rules, regulations, and protocol. Their workspace is pragmatic and free of clutter, and it's not unusual to find framed degrees or certifications proudly displayed on their walls.

Strengths:

A bias toward action, consistency, and practicality

Spotting the flaws in plans or processes

Keeping data organized

Creating thorough processes and plans

Blind spots:

Rigidity

Might miss opportunities because they don't want to deviate from the plan

Lack of spontaneity

Excessive attachment to the outcome

Valuing process over project

Communication style: There's nothing a Planner loves more than schedules and action plans. If you want to get the point across to a Planner, do it in writing and make it detailed and step-by-step.

Because they focus on process, Planners tend to ask 'how' questions: How will we complete these tasks? How will we resolve this issue? How can we improve this process?

The Arranger

Characteristics: Expressive, supportive, collaborative, team-oriented

Expression, emotion, and teamwork fuel the Arranger. They love to collaborate with others on projects, and with every decision, they strive to understand how a choice will affect everyone involved. Much like their productivity style, an Arranger's office is welcoming and filled with personal touches—from family photos to music to artwork.

Strengths:

Effective communication

Awareness of others' emotions

A strong intuition

Persuasion

Teaching

Blind spots:

Missing key details because of incomplete planning

Lack of awareness of how their style affects others

Excessive involvement with people; taking too much responsibility for other people's problems

Near-sighted, losing focus on the end results

Valuing people over project

Communication style: Talkative and warm, the Arranger prefers in-person conversations where they can make full use of their body language and tone of voice to connect with their teammates. They tell stories to get their point across and like to know how a project or task will affect others.

Because they focus on people, Arrangers tend to ask '**who**' questions: Who's involved with this project? Who's in favour of this decision? Who can help with this task?

The Visualizer

Characteristics: Holistic, intuitive, integrating, synthesizing, big-picture thinking

Often serving as a catalyst for change, the Visualizer keeps their eyes on the big picture and dislikes being bogged down by details, structure, and tradition. They have a knack for connecting seemingly disparate pieces of information and can run wild with creativity. Peer into their office, and you're likely to find a desk piled high with papers, personal items, and collectibles.

Strengths:

Open-mindedness

Seeing the big picture

Innovation

Creative problem-solving

Blind spots:

Tendency to overlook the details

May fail to plan ahead and end up turning in work late

Excessive spontaneity and impulsiveness

Valuing possibilities over process

Communication style: Not surprisingly, the Visualizer likes to use visual words when communicating, such as "see," "envision," and "the big picture." Using metaphors and visual aids will help get your message across to the Visualizer. Further, the Visualizer appreciates knowing how a task or project will fit into the overarching goals of your company.

Because Visualizers focus on long-term vision, they tend to ask **why** questions: Why does this matter to the company? Why are we going with this option? Why did we decide to pivot?

Productivity 'Styles'

Procrastination

Procrastination means delaying a task (or even several tasks) that should be a priority.

The ability to overcome procrastination and tackle the important tasks is a hallmark of the most successful people out there.

I am a great believer in luck, and I find the harder I work, the more I have of it.

Thomas
Jefferson

Why We Procrastinate

No clear deadline

Inadequate resources

Where to begin?

Feel overwhelmed

Lack of passion

Fear of failure

Top 10 Reasons why we tend to procrastinate

- 1.No clear deadline
- 2.Inadequate resources available
- 3.Don't know where to begin
- 4.Task feels overwhelming
- 5.No passion for doing the work
- 6.Fear of failure or success
- 7.Perfectionism
- 8.Overanalysing
- 9.Focus on the negatives

“Clutter is nothing more than postponed decisions.” — Barbara Hemphill

The 5S Method

to Unlock a Clutter-Free (Less Stressful) Life

The 5S Method

**Step 1:
Sort (Seiri)**
Remove unnecessary items. Keep only what's needed.

**Step 2:
Set in Order (Seiton)**
Organize items for easy access. Everything has a place.

**Step 3:
Shine (Seiso)**
Tidy up regularly. Maintain cleanliness.

**Step 4:
Standardize (Seiketsu)**
Create simple, repeatable routines to keep order.

**Step 5:
Sustain (Shitsuke)**
Keep to the rules. Make 5S a habit.

At Home

(Inspired by Rebecca Enberg)

1. Go through every room and decide what truly needs to stay.

Two powerful questions:

- “Does this spark joy?” —Marie Kondo
- Is this prompting a good or bad habit?

If it doesn't add value to your life, it's time to let it go. Be ruthless.

2. Establish a home for every item.

My advice:

- List your most misplaced items (keys, wallet, etc.)
- Make a home for these things today.
- Keep everyday items accessible and store away seasonal items.

3. Clean up because visual signs of disorder promote more disorder.

Consider what happens when a dirty dish is left in the sink. It's easy for sloppiness to spiral out of control.

A clean and ordered space promotes your mental clarity.

4. Put tidiness on auto-pilot.

Powerful strategies to maintain order:

- Use a visual cleaning schedule
- Time-block 15 mins per day for tidying up. And 1 hour per week for deeper cleaning.
- If you can, consider outsourcing cleaning to a professional service.

5. Use a “clean as you go” approach.

Tips for families with kids:

- **Kid-Friendly Storage:** Make solutions accessible to kids, so they can take responsibility for their belongings.
- **Zone Your Home:** Create clearly-defined zones for play, work, relaxation & eating.
- **Daily Cleaning Blitz:** Have a short, daily routine where the whole family tidies up.

At Work

(Inspired by Japanese manufacturing)

1. Keep your workspace tidy—including your digital files.

A tidy desk is a tidy mind.

- At the end of your workday, spend 5 mins clearing your desk of clutter.
- Unsubscribe from unnecessary emails.
- Create a weekly or monthly routine to delete old, irrelevant computer files.

2. Designate specific spots for everything.

- Assign a “home” for your gadgets, like a docking station or holder for your phone.
- Keep frequently used tools (e.g. pen and notepad) within arm's reach.
- Implement a “no-distraction” zone on your desk. Keep this area clear no matter what.

3. Systemize and gamify your cleaning time.

- Wipe down your desk and devices at the end of each day.
- Consider having a mini vacuum for electronics & a plant to freshen your air.
- If in an office, hold a monthly “clean-up” game with rewards.

4. Build a repeatable routine.

- Start your day with a 2-min organization check. Get items to their designated spots.
- Use digital reminders for weekly file backups and clean-ups.
- Have a Friday ritual to get your workspace ready for the next week.

5. Keep the habit going.

- Reward yourself for a clutter-free week. Maybe a special treat or favorite show.
- Post a small, visible checklist of your 5S steps at your desk.
- Adopt the “clean as you go” philosophy at work, too (much like a chef cleaning their kitchen as they cook).

5S - Terminology

COMMON TERMS IN THE STRAIGHTEN PHASE (used for categorisation)

R

Runner

- A runner is something that you use frequently (several times a day). It should be kept close to hand so you don't waste time having to retrieve it.

R

Repeater

- A repeater is something that you use often, (several times a week), and should be located where it is easy to access.

S

Stranger

- A stranger is something that is used rarely and should be stored out of the way, but where they can be found easily

Improving Motivation

Goals can be inspiring, but that inspiration can fade in the reality of everyday life. Implementing different methods of motivation such as remembering peak moments, writing down goals and gamification will help keep you stay focused and positive as you work towards your goals.

*Motivation gets
you started.
Habit is what
keeps you going.*

Jim Ryun

motivators

Smart Goals

If you cannot achieve your goals, there is a chance that you are not creating the correct goals. Whenever you create goals, you will find that following the rules for SMART goals will be easier to achieve. SMART goals are specific, measurable, attainable, realistic, and timely.

Goals allow you to control the direction of change in your favour.

Brian Tracy

Schneerson**

The 80/20 Rule: Activity P70

20% of
actions

The diagram illustrates the 80/20 rule using two circles and an equals sign. On the left is a green circle containing the text '20% of actions'. To its right is a green equals sign, represented by two horizontal bars. To the right of the equals sign is a purple circle containing the text '80% of results'.

80% of
results

Utilise a Calendar

Keep the calendar with you:

List appointments and day events

Avoid notes

Include phone numbers

Create a Ritual

Improves time management

Repetitive actions

Be disciplined in your efforts

Ritualizing Sleep, Meals, and Exercise

Establish
a ritual
before
you
sleep

Plan
meals
for the
next
week

Try to
exercise
for one
hour
three
times a
week

Example Rituals

Lay out clothes
the night before

Prepare your
lunch

Batch together
activities

Using Rituals to Maximize Time

During a break, read for 10 minutes

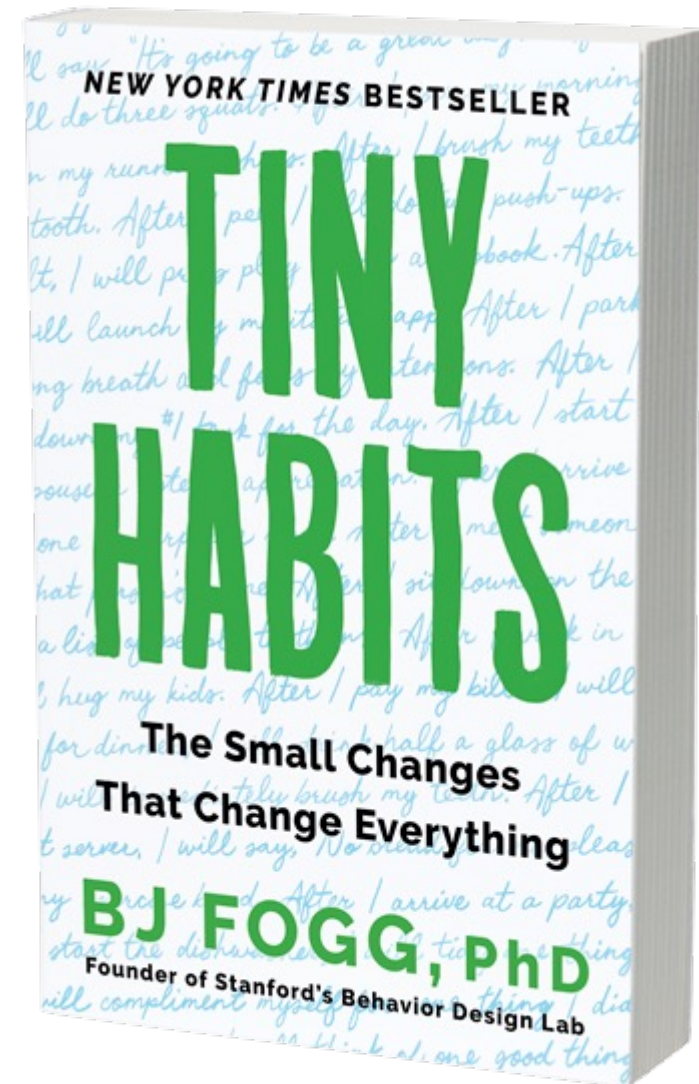

Deep breathing and stretches

Clean off a small area

Update your journal

Set aside a lunch hour for
personal errands

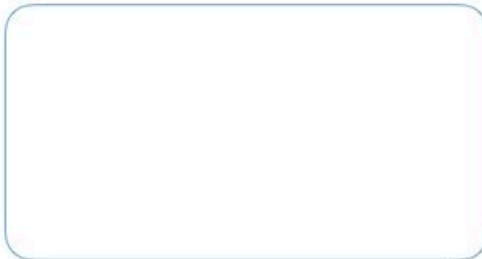

BJ Fogg 'Tiny Habits'

Tiny Habits Recipe Card

Create a recipe for your new habit.

After I . . .

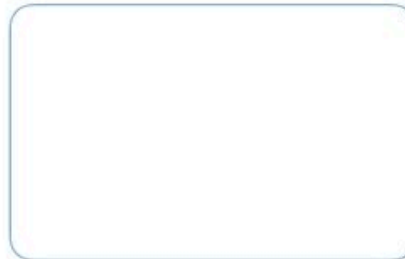

Anchor Moment

An existing routine in your life that will remind you to do the Tiny Behavior (your new habit.)

I will . . .

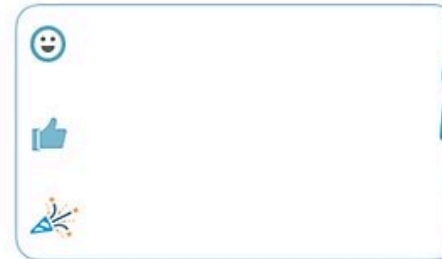

Tiny Behavior

The new habit you want but scaled back to be super tiny - and super easy.

Then, I celebrate!

Celebration

Something you do to create a positive feeling inside yourself.

Note: Feel free to revise.

Tips for Completing Tasks

It is easy to begin tasks, but completing them is much more difficult. Life will always find a way to distract us from our tasks. Given how easy it is to procrastinate and avoid tasks, most people have a list of tasks waiting to be completed. As this list grows, stress levels increase.

*It's the people
who follow-
through who
excel.*

Mary Kay Ash

One Minute Rule

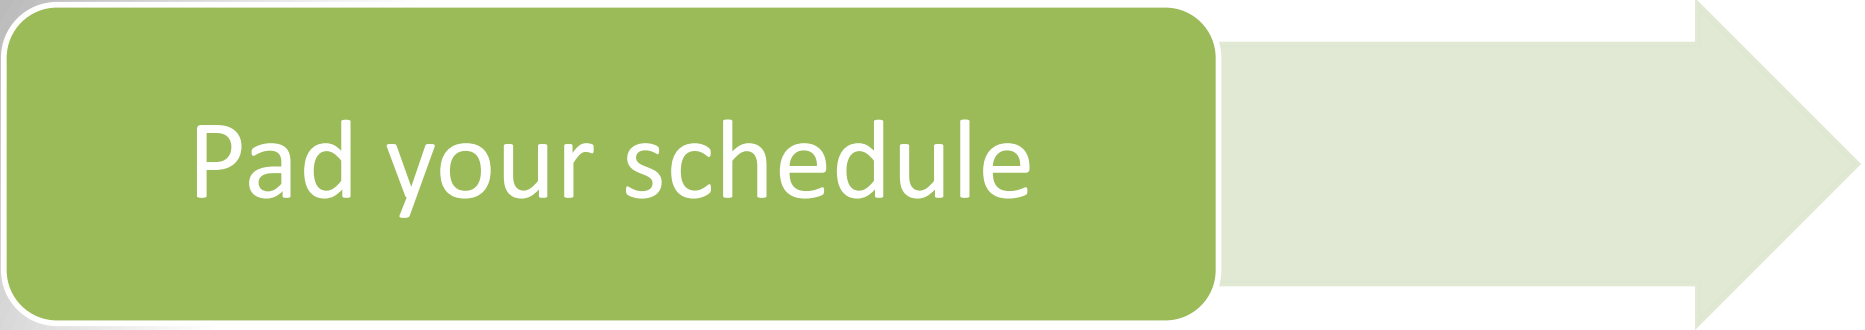

Small simple
tasks

Complete it
immediately

Save time in
the long run

Five Minute Rule

Pad your schedule

Break projects into 15 minute tasks

Block out time to complete each chunk

Tackle each specific task individually

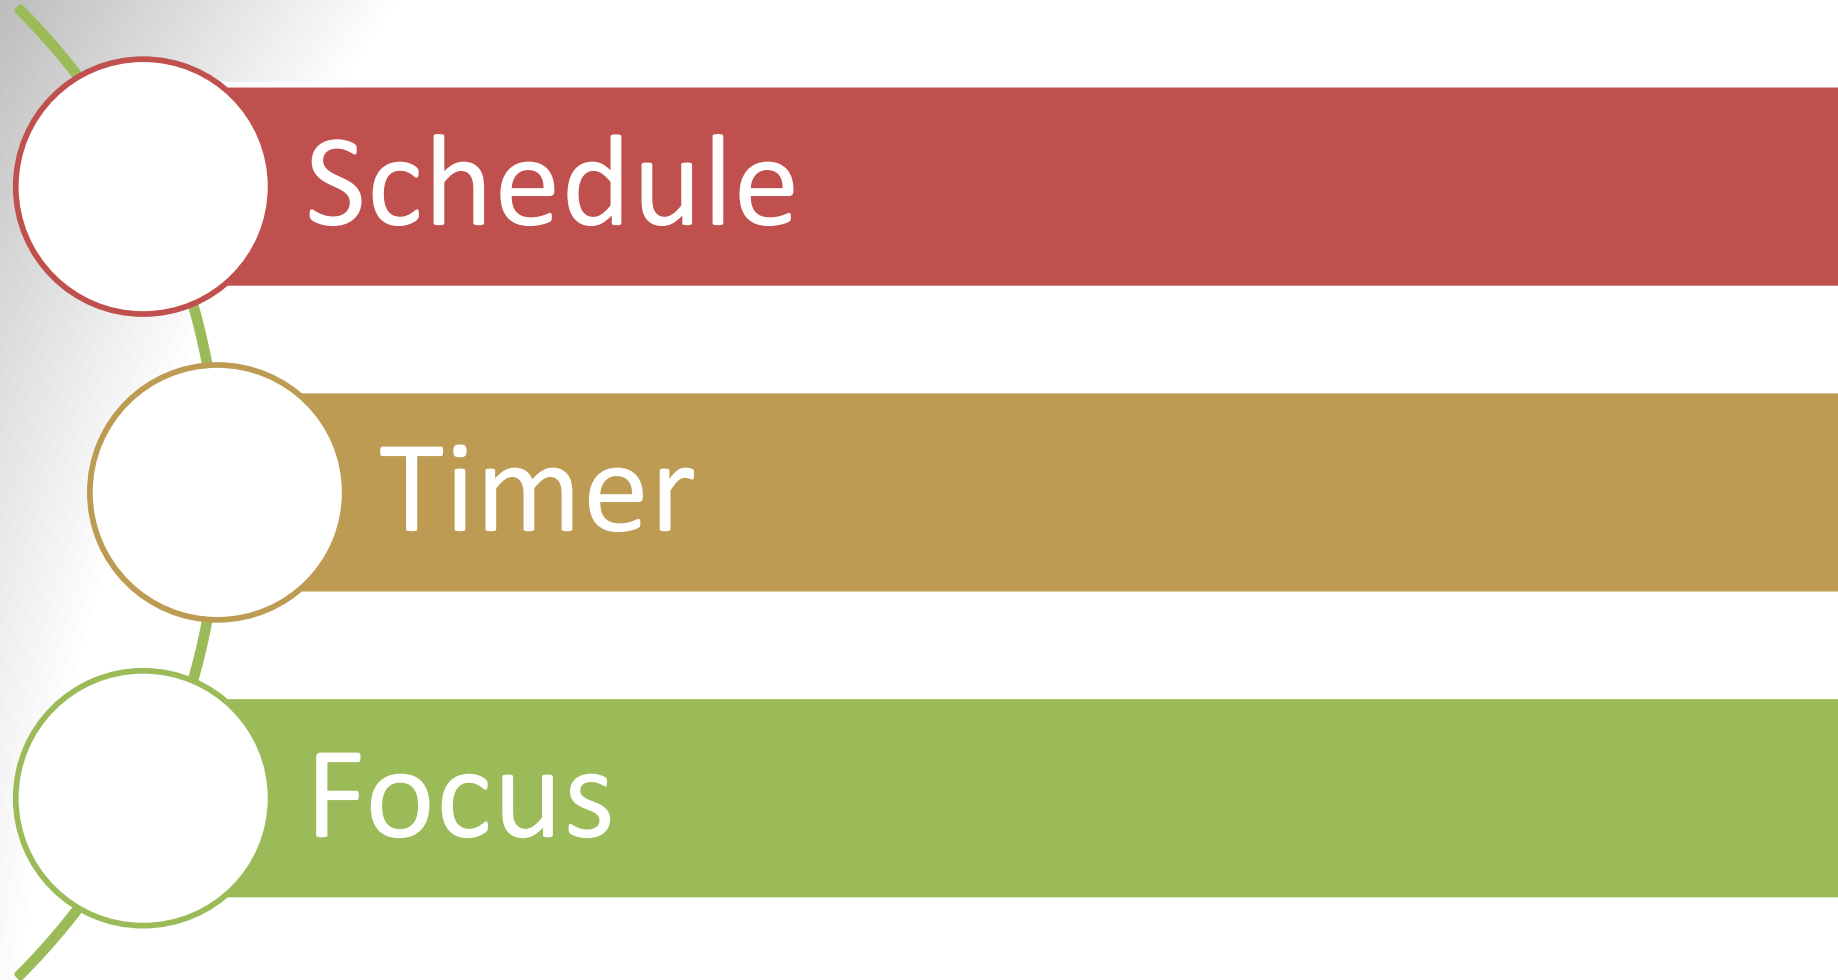

Make It a Habit

Same time
each day

Transfer
unfinished
tasks

Should
become
second nature

Plan Ahead

Mistakes Will Happen

No matter how well you prepare or what precautions you take, mistakes will happen. Mistakes are an essential part of life. Without them, it is not possible to fully grow and learn. When mistakes do occur, the key is to bounce back, learn from them, and move forward.

*Mistakes are
always
forgivable, if
one has the
courage to
admit them.*

Bruce Lee

Accept It

Do not make
excuses

Apologise

Be honest

Bouncing Back

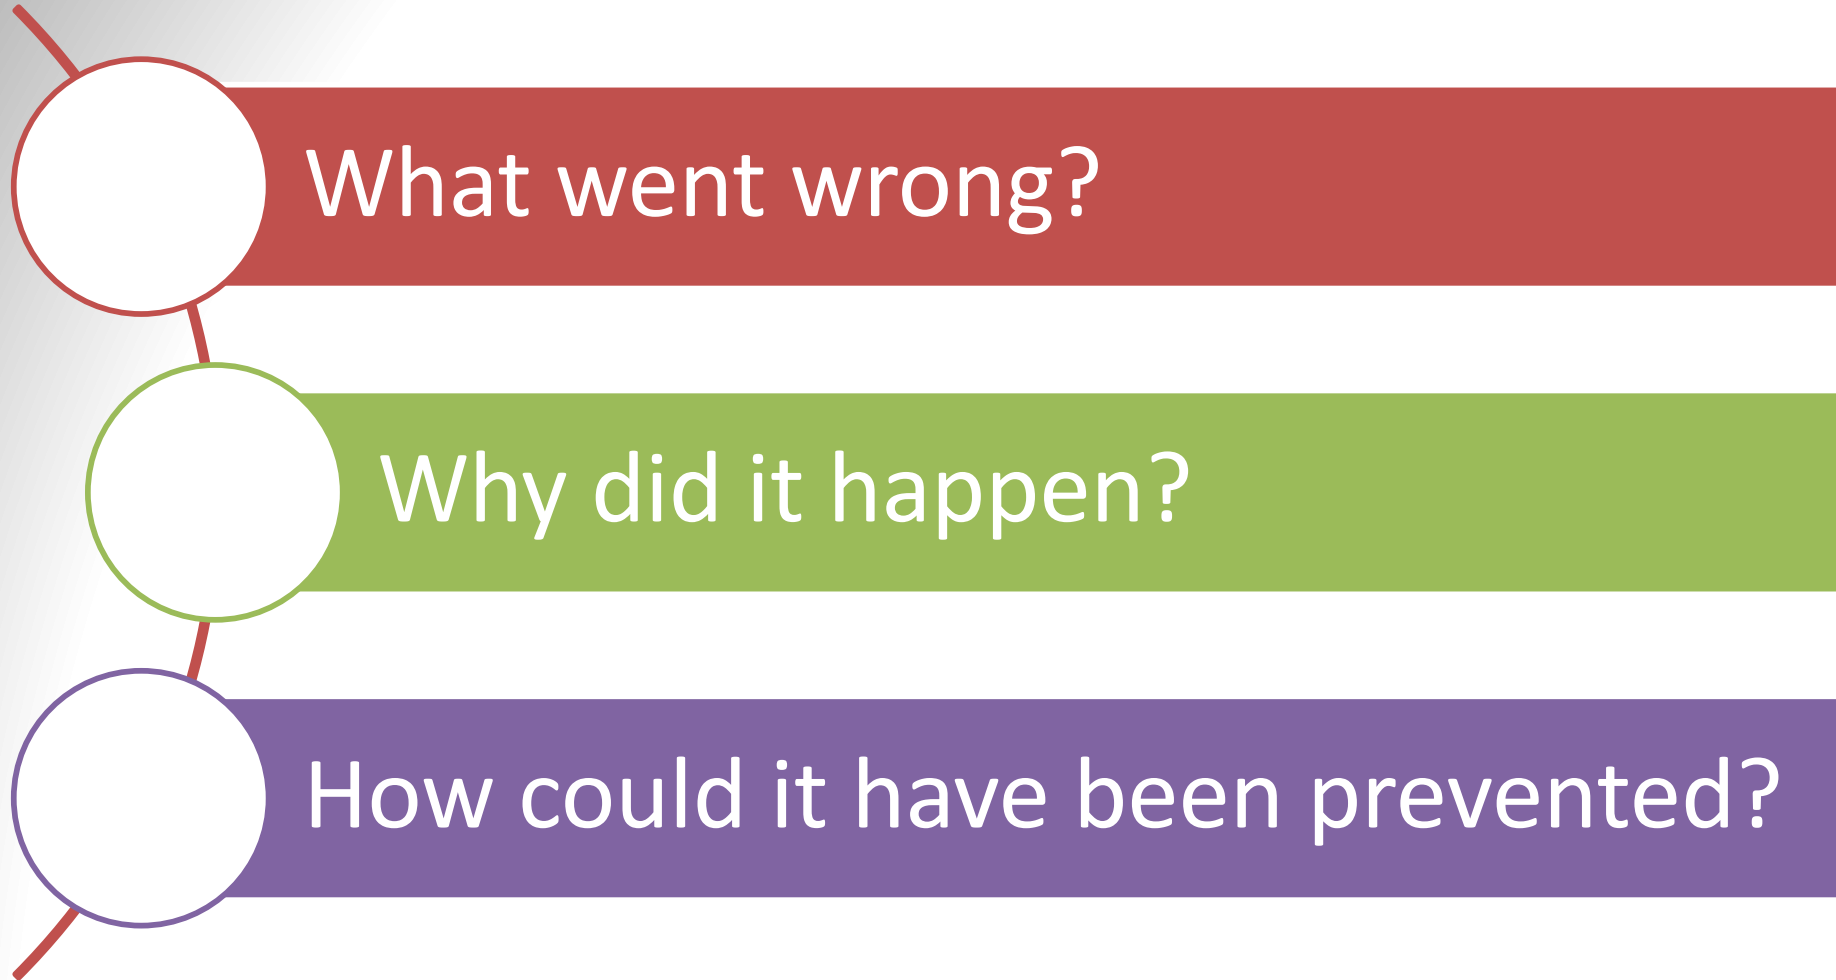

Everyone makes mistakes

Successful people bounce back

Positive attitude

Adapt and Learn from Them:

Activity P76

If Needed, Ask for Help

Ask: do not demand

Be straightforward

Be thankful

WorkFlowy

Organize your brain.

Anticipating Time Using

PERT: Project Evaluation and Review Technique

Estimated time = optimistic estimate + (4 x most likely estimate) + pessimistic estimate divided by 6

This PERT formula is considered the standard for estimating time (T_e):

$$(T_e) = \frac{T_o + 4T_m + T_p}{6}$$

T_e =Calculated Time (Best Estimate)

T_o = Optimistic Time

T_m = Probable Time x 4

T_p =Pessimistic Time

Std dev:

$$\frac{T_o - T_p}{6}$$

Using PERT to Wash the Car

Where

$T_o = 60$ minutes

$T_m = 90 \text{ minutes} \times 4 = 360$

$T_p = 180$ minutes

$$T_e = \frac{60 + 360 + 180}{6} = \frac{600}{6}$$

$T_e = 100$ minutes

Top 2 takeaways of the day
