

INFORMATION SECURITY POLICY

Approved and authorized by:

Ludovic HUTIER

Chief operating officer

Date: 16th of August 2024

1. Overview

This Information Security Policy is intended to protect BW Digital's employees, partners and the company from illegal or damaging actions by individuals, either knowingly or unknowingly.

Internet/Intranet/Extranet-related systems, including but not limited to computer equipment, software, operating systems, storage media, network accounts providing electronic mail, web browsing, and file transfers, are the property of BW Digital. These systems are to be used for business purposes in serving the interests of the company, and of our clients and customers in the course of normal operations.

Effective security is a team effort involving the participation and support of every BW Digital employee or contractor who deals with information and/or information systems. It is the responsibility of every team member to read and understand this policy, and to conduct their activities accordingly.

2. Purpose

The purpose of this policy is to communicate our information security policies and outline the acceptable use and protection of BW Digital's information and assets. These rules are in place to protect customers, employees, and BW Digital. Inappropriate use exposes BW Digital to risks including virus attacks, compromise of network systems and services, and legal and compliance issues.

The BW Digital "Information Security Policy" is comprised of this policy and all BW Digital policies referenced and/or linked within this document.

3. Scope

This policy applies to the use of information, electronic and computing devices, and network resources to conduct BW Digital business or interact with internal networks and business systems, whether owned or leased by BW Digital, the employee, or a third party. All employees, contractors, consultants, temporary, and other workers at BW Digital and its subsidiaries are responsible for exercising good judgment regarding appropriate use of information, electronic devices, and network resources in accordance with BW Digital policies and standards, and local laws and regulations.

This policy applies to employees, contractors, consultants, temporary workers, and other workers at BW Digital, including all personnel affiliated with third parties. This policy applies to all BW Digital-controlled company and customer data as well as all equipment, systems, networks and software owned or leased by BW Digital.

4. Security incident reporting

All users are required to report known or suspected security events or incidents, including policy violations and observed security weaknesses. Incidents shall be reported immediately or as soon as possible by sending email to **it-servicedesk@bw-digital.com**.

In your report, please describe the incident or observation along with any relevant details.

5. Whistleblower anonymous fraud reporting

Our Whistleblower Policy is intended to encourage and enable employees and others to raise serious concerns internally so that we can address and correct inappropriate conduct and actions. It is the responsibility of all employees to report concerns about violations of our code of ethics or suspected violations of law or regulations that govern our operations.

It is contrary to our values for anyone to retaliate against any employee or who in good faith reports an ethics violation, or a suspected violation of law, such as a complaint of discrimination, or suspected fraud, or suspected violation of any regulation. An employee who retaliates against someone who has reported a violation in good faith is subject to discipline up to and including termination of employment.

Anonymous reports may be submitted via <https://forms.office.com/r/HKUdSfA6vJ> (to be opened in Private Window).

6. Clear screen clear desk policy

Users shall not leave confidential materials unsecured on their desk or workspace and will ensure that screens are locked when not in use.

7. Core responsibilities

BW Digital proprietary and customer information stored on electronic and computing devices, whether owned or leased by BW Digital, the employee or a third party, remains the sole property of BW Digital for the purposes of this policy. Employees and contractors must ensure through legal or technical means that proprietary information is protected in accordance with the Data Management Policy. The use of Microsoft Sharepoint for business file storage is required for users of laptops or company issued devices. Storing important documents on the file share is how you “backup” your laptop.

You have a responsibility to promptly report the theft, loss, or unauthorized disclosure of BW Digital proprietary information or equipment. You may access, use or share BW Digital proprietary information only to the extent it is authorized and necessary to fulfill your assigned job duties.

For security and network maintenance purposes, authorized individuals within BW Digital may monitor equipment, systems and network traffic at any time.

BW Digital reserves the right to audit networks and systems on a periodic basis to ensure compliance with this policy.

7.1. General

Users must only use hardware and software provided by BW Digital in conducting work-related activities. No software other than that provided by BW Digital may be used on or downloaded to the provided hardware.

In addition to the general rules above, all users shall:

- Devices must be locked with a password (or equivalent control such as biometric) protected screensaver or screen lock after 5 minutes of non-use
- Always keep mobile equipment physically secure.
- Sanitize or destroy electronic media and papers that contain sensitive data when no longer needed.
- Keep all password credentials secret and always comply with the company's password policy.
- Refrain from accessing company cloud information systems (MS Outlook, MS Teams, MS Sharepoint, MS Onedrive, etc...) on personal devices.
- Keep devices up to date and support the IT team efforts to deploy software updates.
- Return all and any such devices to BW Digital if requested or on contract termination.

Personal use of the company's computer equipment and internet connection is tolerated, as long as that use is at a reasonable level, does not compromise BW Digital networks in any way, does not result in BW Digital incurring costs and otherwise complies with this IT usage policy.

7.2. Mobile phones

The same principle above applies to mobile phones.

The use of business phones—including mobile phones, VoIP applications, and analogue/IP phones—is intended primarily for business purposes. While reasonable personal use is permitted, it must remain within acceptable limits and not interfere with work responsibilities. Please note that call records may be monitored and/or recorded for security and compliance purposes.

7.3. Email

All BW Digital employees will be provided with an individual email account.

In addition to meeting the rules that apply generally to IT resources, users shall:

- Report suspicious emails to IT team (it-servicedesk@bw-digital.com) and do not click on any embedded links and/or open attachments.
- Only use email accounts for which they have authority.
- Use email accounts primarily for business related purposes
- Be vigilant in forwarding any business email to a third-party email (in particular, avoid forwarding confidential or sensitive information).
- In email messages, use a standard BW Digital email signature and confidentiality notice.

The following email activities are strictly prohibited, with no exceptions:

- Sending unsolicited email messages, including the sending of "junk mail", or other advertising material to individuals who did not specifically request such material (email spam)
- Any form of harassment via email, telephone, or texting, whether through language, frequency, or size of messages
- Unauthorized use, or forging, of email header information
- Solicitation of email for any other email address, other than that of the poster's account, with the intent to harass or to collect replies
- Creating or forwarding "chain letters", "Ponzi", or other "pyramid" schemes of any type

7.4. Social media and Blogging

- Access to and use of social media and blogging using IT resources must be for work purposes only.
- The prohibitions in this policy on disclosing confidential or sensitive information relating to BW Digital and their partners apply equally when engaging in social media and/or blogging.
- Similarly, users must not engage in any social media and/or blogging that may compromise the reputation of BW Digital and/or any of its employees.
- Employees must not make any harmful, discriminatory, disparaging, defamatory or harassing comments when using social media and/or blogging.
- Employees must comply with all laws, and refrain from using BW Digital logos and other intellectual property, in connection with any social media and blogging activity.

7.5. Photos and videos

- Employees may only take photos or videos in the workplace for lawful and work-related purposes.
- Employees may post, publish, or distribute photos or videos taken in the workplace with BW Digital permission or if it's for a lawful work-related purpose.
- Employees may share photos and/or videos that have been published by BW Digital's public channels.

8. Remote work

At BW Digital, we are committed to enabling remote work while ensuring that our information assets remain secure. Employees working remotely must adhere to the following security guidelines to protect the integrity, confidentiality, and availability of company data:

- **Secure Work Environment:** Employees are responsible for ensuring that their remote workspace is secure. This includes using a dedicated, private workspace and avoiding public areas where sensitive information could be exposed.
- **Device Security:** Only company-approved devices should be used for accessing BW Digital systems. Employees must ensure that these devices are up to date with the latest security patches, antivirus software, and firewalls.
- **Network Security:** Employees must connect to the internet using secure and trusted networks. The use of public Wi-Fi networks (including airplane WiFi, hotel networks) is strictly prohibited unless connected via a company-approved Virtual Private Network (VPN). We recommend using Mobile phone as a hot spot device, when possible, for enhanced security.
- **Data Protection:** Confidential information must be handled with care. Employees should avoid storing sensitive data locally on their devices and should instead use company-approved cloud storage solutions.
- **Access Management:** Employees must ensure that access credentials, such as passwords and multi-factor authentication devices, are kept secure and not shared with anyone. Lock screens should be enabled when devices are unattended.
- **Incident Reporting:** Any suspicious activity or potential security incident must be reported immediately to the Information Security team, regardless of whether it occurs during remote work.

By following these guidelines, employees contribute to maintaining a secure environment for remote work, supporting BW Digital's overall cybersecurity posture.

9. Prohibited use

The following activities are generally prohibited unless an employee is specifically authorized with documented management approval as part of their legitimate job responsibilities. Under no circumstances may a BW Digital employee engage in any activity that is illegal under local, state, federal, or international law while using BW Digital resources or while representing the company in any capacity. This list is not exhaustive but provides a framework for activities considered unacceptable:

- Violating intellectual property rights by copying, distributing, or using copyrighted materials, trade secrets, or patented products without proper authorization, including the installation or distribution of unlicensed software.
- Unauthorized copying or distribution of copyrighted materials, including digitized images, music, or software without an active license.

- Exporting software, technical information, or encryption technology in violation of export control laws without consulting appropriate management.
- Introducing malicious programs (e.g., viruses, worms, Trojan horses) into company systems.
- Sharing or disclosing account passwords or allowing unauthorized users (including family members) access to BW Digital systems.
- Using company assets to transmit or procure materials in violation of sexual harassment or hostile workplace laws.
- Making fraudulent offers or misrepresenting products, services, or warranties through BW Digital accounts.
- Conducting unauthorized security testing, including port scanning, network sniffing, or monitoring unless part of official duties.
- Circumventing security controls, user authentication, or unauthorized access to systems or accounts.
- Introducing unauthorized security tools, such as honeypots or similar technology.
- Deliberately interfering with network services or user sessions (e.g., denial of service attacks).
- Sharing or distributing lists or information about BW Digital employees, contractors, partners, or customers without proper authorization.
- Creating, downloading, viewing, or distributing materials related to explicit content, illegal activities, gambling, or other prohibited subjects.
- Concealing, falsifying, or destroying information for personal or unauthorized use.
- Using BW Digital IT resources for personal commercial activities, outside employment, or for-profit ventures.
- Engaging in fundraising, product endorsements, or political activities using company resources.
- Adding personal IT resources or modifying company systems without management approval.
- Removing company IT equipment from BW Digital premises without authorization.
- Installing and using communication tools on non-BW Digital devices to access company communication channels (e.g., email, chat, calls) without approval.

10. Cyber awareness training

At BW Digital, we recognize that while robust technical defenses are vital, enhancing our cybersecurity posture also requires a strong focus on employee awareness and education. Since cybersecurity sensitivity varies among individuals, it is essential to ensure that all employees are equipped with the knowledge needed to protect our intellectual property and operational integrity. To achieve this, BW Digital is implementing a mandatory cyber awareness training program designed to enhance employees' ability to identify and respond to cyber threats effectively. This training will not only support our professional objectives but also provide valuable insights that can be applied to your personal digital safety.

11. Policy compliance

BW Digital has the right, at all and any time and without notice, to inspect IT resources to check whether this policy or any other relevant policy has been complied with. These inspections may be conducted in the presence or absence of the affected employee.

Employees have no right of privacy as to any information or file maintained in or on or transmitted or stored through IT resources.

12. Violations & enforcement

Any known violations of this policy should be reported to the CISO. Violations of this policy can result in immediate withdrawal or suspension of system and network privileges and/or disciplinary action in accordance with company procedures up to and including termination of employment.

13. Agreement

I have read and been informed of the content, requirements, and expectations of the Information Security Policy for employees of BW Digital. I have received a copy of the policy and agree to abide by the policy guidelines as a condition of my employment and my continuing employment at BW Digital.

I understand that if I have questions, at any time, regarding this policy, I will consult with my immediate supervisor or my Human Resources manager.

Please read this policy carefully to ensure that you understand the policy before signing this document.
