

IT USAGE POLICY

Approved and authorized by:

Ludovic HUTIER

Chief operating officer

Date:

1. Overview

BW DIGITAL is committed to protecting all of its stake holders – including its employees, the employees of, and contractors to its primary services company International Connectivity Services Limited (**ICS**) and asset companies HAWAIIKI, HAWAIIKI NUI and DATAGRID and their respective partners and vendors from illegal or damaging actions by individuals (whether intentional or unintentional).

Also BW DIGITAL, as a telecommunications company landing on the US soil, as some mandatory obligations related to its license granted by FCC especially regarding cybersecurity compliance.

Effective security is a team effort involving the participation and support of every person who uses BW DIGITAL and its subsidiaries owned or operated hardware or software and the data used or stored on it (**IT resources**). It is the responsibility of person using IT resources (**IT user**) to know and comply with the rules described in this policy.

2. Purpose

The purpose of this policy is to describe the acceptable use of IT resources and define the responsibilities of IT users to use and protect the IT resources appropriately.

3. Scope

This policy applies to the use of all BW Digital IT resources. All employees and contractors of, and consultants to BW Digital and its subsidiaries are responsible for exercising good judgment regarding appropriate use of the IT resources in accordance with BW Digital policies and standards, and law.

This policy:

- applies to all employees and contractors of, and consultants to ICS, Hawaiki, Hawaiki Nui and Datagrid
- applies wherever and whenever IT resources are used — on site or away from work
- is to be used in conjunction with the BW Digital CyberSecurity plan and guidelines.

4. Policy

4.1. Core responsibilities

All employees must use IT resources responsibly and reasonably. That use must not interfere with work duties, harm, or pose a risk to BW Digital and its subsidiaries or any other person's business or reputation or be illegal.

Meeting these core responsibilities also means that an IT user can't:

- Disclose any confidential or commercially sensitive information about BW Digital and its subsidiaries or their customers' business, except as is lawfully permitted
- Risk the security, safety or ability of the company's systems, e.g.: by downloading, streaming or storing content or by opening suspicious or unexpected attachments.
- Allow any third party to use IT resources.

4.2. Hardware and software

IT users must only use hardware and software provided by BW Digital and its subsidiaries in conducting work related activities. No software other than that provided by BW Digital and its subsidiaries may be used on or downloaded to the provided hardware. That software must not be copied for personal use. Software may only be installed by authorized BW Digital and its subsidiaries staff.

In addition to the general rules above, all IT users should:

- immediately report all lost or stolen equipment, known or suspected security incidents, known or suspected security policy violations or compromises, or suspicious activity.
- log off or lock systems when leaving them unattended.
- always keep equipment physically secure
- sanitize or destroy electronic media and papers that contain sensitive data when no longer needed
- use a VPN network when connecting to the BW Digital and its subsidiaries systems externally or connecting onto a public network (WiFi, Mobile networks)
- not connect to public networks if possible, and instead use a smartphone as a mobile hotspot
- keep all password credentials secret and always comply with company's password policy
- keep the company's WiFi usernames, access codes and passwords confidential and secure at all times
- Software allowing access to company communications channels (emails, chat, voice call, conference call) shall only be used and installed on company supplied devices.

Personal use of the company's computer equipment and internet connection is tolerated, as long as that use is at a reasonable level, does not compromise BW Digital and its subsidiaries networks in any way, does not result in either BW Digital or its subsidiaries incurring costs and otherwise complies with this IT usage policy.

4.3. Email

All BW Digital and its subsidiaries employees will be provided with an individual user account which they must use to access IT resources (including e-mail).

In addition to meeting the rules that apply generally to IT resources, IT users must:

- report suspicious emails to IT team and do not click on any embedded links and/or open attachments
- only use email accounts for which they have authority.
- use email accounts primarily for business related purposes - personal communication is permitted on a limited and reasonable basis, but non-business-related commercial uses are prohibited.
- not rely on the privacy of anything stored, sent or received on the company's email system
- be vigilant in forwarding any business email to a third-party email (in particular, avoid forwarding confidential or sensitive information).
- in email messages, use a standard BW Digital and its subsidiaries email signature and confidentiality notice.

4.4. Work phones and VOIP

Work phones (whether a mobile phone, VoIP application, and/or Analogue/IP phone) are provided exclusively for work purposes, although a level of reasonable personal use is permitted. Call records will be monitored and/or recorded.

Software allowing access to company communications channels (emails, chat, voice call, conference call) shall only be used and installed on company supplied devices.

4.5. Mobile devices

In addition to the general rules described above that apply to all hardware, in using mobile devices (mobile phones, tablets etc) supplied by BW Digital and its subsidiaries, IT users must:

- not use those mobile devices to view or download material or view offensive, inappropriate or illegal content.
- Always keep all such devices safe and secure

- ensure those mobile devices are protected with a password, or a PIN, or the like that is secret and in line with Hawaiki's password policy.
- ensure that no unauthorized person uses the device.
- return all and any such devices to ICS or Hawaiki if requested or on contract termination.

4.6. Social media and Blogging

- Access to and use of social media and blogging using the IT resources must be for work purposes only.
- The prohibitions in this policy on disclosing confidential or sensitive information relating to BW Digital and its subsidiaries and their partners apply equally when engaging in social media and/or blogging.
- Similarly, IT users must not engage in any social media and/or blogging that may compromise the reputation of BW Digital, its subsidiaries and/or any of their employees.
- Employees must not make any harmful, discriminatory, disparaging, defamatory or harassing comments when using social media and/or blogging
- Employees must comply with all laws, and refrain from using BW Digital and its subsidiaries logos and other intellectual property, in connection with any social media and blogging activity.

4.7. Access to IT resources

BW Digital and its subsidiaries have the right, at all and any times and without notice, to inspect IT resources to check whether this policy or any other relevant policy has been complied with. These inspections may be conducted in the presence or absence of the affected employee.

Employees have no right of privacy as to any information or file maintained in or on or transmitted or stored through IT resources.

4.8. Photos and videos

- Employees may only take photos or videos in the workplace for lawful and work-related purposes.
- Employees may post, publish or distribute photos or videos taken in the workplace with BW Digital and its subsidiaries permission or if it's for a lawful work-related purpose.
- Employees may share photos and/or videos that have been published by the company's public channels.

4.9. Passwords

Passwords should never be written down or stored on-line in an unencrypted format. Users must create passwords that can be easily remembered. One way to do this is to create a password based on a song title, affirmation, or another phrase. For example, the phrase might be: "This May Be One Way To Remember" and the password could be: "TmB1w2R!" or "Tmb1W>r~" or some other variation. NOTE: Do not use either of these examples as passwords! Strong (good) passwords have the following characteristics:

- Contain both upper and lower case characters (e.g., a-z, A-Z)
- Have digits and punctuation characters as well as letters (e.g., 0-9, !@#%&*)
- Eight (8) or more alphanumeric characters.
- Not a word in any language, slang, dialect, or jargon.
- Not based on personal information, names of family, or important calendar dates.

Weak (bad) passwords have the following characteristics:

- Default vendor password
- Contain less than eight (8) characters
- A word found in a dictionary (English or foreign)
- A common usage word such as:
 - Names of family, pets, friends, co-workers, fantasy characters, etc.
 - Computer terms and names, commands, sites, companies, hardware, software.
- The words "Hawaiki" or any derivation.
- Birthdays and other personal information such as addresses and phone numbers.
- Word or number patterns (e.g., aaabbb, qwerty, zyxwvuts or 123321)
- Any of the above spelled backward.
- Any of the above preceded or followed by a digit (e.g., secret1 or 1secret)

5. Prohibited use

Users shall not:

- Direct or encourage others to violate organizational policies, procedures, standards, or guidelines.
- Circumvent security safeguards or reconfigure systems except as authorized (e.g., violation of least privilege).
- Use another user's account, identity, or password.
- Exceed authorized access to sensitive information.
- Cause congestion, delay, or disruption of service to any organization-owned IT resource. For example, greeting cards, video, sound or other large file attachments can degrade the performance of the entire network, as does some uses of "push" technology, such as audio and video streaming from the Internet.
- Create, download, view, store, copy or transmit materials related to sexually explicit or sexually oriented materials.
- Create, download, view, store, copy or transmit materials related to gambling, illegal weapons, terrorist activities, illegal activities or activities otherwise prohibited.
- Store sensitive information in public folders or other insecure physical or electronic storage locations.
- Share sensitive information, except as authorized and with formal agreements that ensure third parties will adequately protect it.
- Transport, transfer, email, remotely access, or download sensitive information, inclusive of PII, unless such action is explicitly permitted by the manager or owner of such information.
- Store sensitive information on mobile devices such as laptops, smartphones, USB flash drives, or on remote systems without authorization or appropriate safeguards, as stipulated by organization policies.
- Knowingly or willingly conceal, remove, mutilate, obliterate, falsify, or destroy information for personal use for self or others.

- Use organization-provided IT resources for commercial purposes or in support of "for-profit" activities or in support of other outside employment or business activity (e.g., such as consulting for pay, administration of business transactions, the sale of goods or services, etc.).
- Engage in any outside fund-raising activity, including non-profit activities, endorsing any product or service, participating in any lobbying activity, or engaging in any prohibited partisan political activity.
- Establish unauthorized personal, commercial, or non-profit organizational web pages on organization-provided systems.
- Use organization-owned IT resources as a staging ground or platform to gain unauthorized access to other systems.
- Create, copy, transmit, or retransmit chain letters or other unauthorized mass mailings regardless of the subject matter.
- Use organization-owned IT resource for activities that are inappropriate or offensive to fellow employees or the public. Such activities include, but are not limited to hate speech, harassment, bullying, intimidation, or other abusive conduct that ridicules others on the basis of race, creed, religion, color, age, sex, disability, national origin, or sexual orientation.
- Add personal IT resources to existing organization-owned systems without the appropriate management authorization, including the installation of modems on data lines and reconfiguration of systems.
- Intentionally acquire, use, reproduce, transmit, or distribute any controlled information including computer software and data that includes information subject to the Privacy Act, copyrighted, trademarked or material with other intellectual property rights (beyond fair use), proprietary data, or export-controlled software or data.
- Send anonymous messages.
- Remove organization-proved IT resources from organization property without prior management authorization.
- Modify software without management approval.
- install & use communications tools to access company communications channels (emails, chat, calls (video and audio)) on any other devices than the one provided by Hawaiki.

6. Agreement

I have read and been informed about the content, requirements, and expectations of the IT usage policy for employees of BW Digital and its subsidiaries. I have received a copy of the policy and agree to abide by the policy guidelines as a condition of my employment and my continuing employment at BW Digital and its subsidiaries.

I understand that if I have questions, at any time, regarding this policy, I will consult with my immediate supervisor or my Human Resources manager.

Please read this policy carefully to ensure that you understand the policy before signing this document.
