PROFILE

- Ten years of experience working in international business environments with good teamwork, excellent client communication, and on-time delivery under pressure.
- Full-stack software development with React, Node.js, Java, and Python along with AWS cloud-native experience.
- Strong problem-solving and data analytics skills.
- Results-oriented, self-motivated, able to adapt to fast changes, and highly committed to learning new technologies to solve real-world problems.
- New Zealand Permanent Resident.

CERTIFICATE

AWS Certified Solutions Architect – Professional	Nov. 2022 — Nov. 2025
AWS Certified Solutions Architect – Associate	Jan. 2021 — Jan. 2024
Microsoft Certified: Azure Fundamentals	Feb. 2022
Neural Networks and Deep Learning, Coursera	Sep. 2017
Structuring Machine Learning Projects, Coursera	Sep. 2017

TECHNICAL SKILLS

Languages: JavaScript | Java | Python
Database: MySQL | MongoDB | DynamoDB
Frameworks: ASP.NET MVC | Laravel | Express | FastApi | flask
Libraries: Node.js | React
Other: AWS | AWS Lambda | CI/CD | Terraform | RestAPI | GraphQL | Linux

WORK EXPERIENCE

Senior Software Engineer, SECTION6, Remote **Aug. 2021 — Present**

SECTION6 helps government organizations and companies build mission-critical systems with the latest technologies.

Responsibilities:

- Built a high throughput data validation pipeline of the energy data management platform for Vector using Java and AWS cloud native technologies (AWS Lambda, DynamoDB, API Gateway, StepFunctions, S3, EFS, SQS, CloudWatch, etc.).
- Set up AWS CI/CD CodeBuild pipelines for the project using Terraform.
- Conducted technical and architecture designs to realize business requirements.
- Optimized and maintained the system to improve its operation efficiency and reduce operation costs.
- Mentored junior developers to help them grow through code review, troubleshooting, etc.
- Led a timesheet pre-invoicing check automation project, with responsibilities including gathering business requirements, planning projects, drafting user stories, designing systems, allocating tasks, and managing/reporting project progress.

Achievements:

- Built the data validation pipeline for the data management system processing millions of meters daily.
- Designed and implemented a caching system for a holiday service that reduced 80% of the API calls of the system.
- Designed and implemented a meter file transfer system using AWS Batch Jobs, Docker and AWS ECR.

Software Engineer, SG Digital, Wellington

Aug. 2019 – Aug. 2021

SG Digital is one of the leading sports betting technology providers and the development partner of the New Zealand Racing Board, which owns tab.co.nz.

Responsibilities:

- Worked as a software developer in the SRE/DEV teams to build new features, maintain different products, and optimize system performance of the sports betting platform tab.co.nz (React, Node.js, Java, Tcl, Informix).
- Worked closely with the Product Owner and Product Designer to understand requirements and specifications, conducted technical analysis, and recommended technical solutions.
- Collaborated with testers, internal teams, and client teams to ensure features/defects were properly built/fixed, tested, and released in an efficient and timely manner.
- Conducted system releases/patches with Ansible Playbook in Dev, Tests, Prep-Prod, and Production environments.
- Mentored junior developers to familiarize the system architecture, frontend/backend codebases, and workflow, and provided technical guidance to ensure their work quality.

Achievements:

- Built new betting products (FixedOddsExotic, Winsurance), work including changes on APIs and React applications. These products generated significant revenue for the client.
- Ensured platform stability during the Melbourne Cup with the highest peak load throughout the year.
- Summarized the domain knowledge, system architecture, functional flows, and how-tos I learned from the first day and shared on the internal wiki page with other employees.

Consultant, Independent Contractor, Beijing, China

Sep. 2015 – Jan. 2018

- Led consulting teams (3 consultants) to carry out airport concession optimization by conducting customer research, and planning retail, food & beverage, and duty-free stores in terms of numbers, locations, layouts, and brands for airport new terminals for major Chinese airports.

Analyst, ICF International, Beijing, China

Jan. 2011 – Aug. 2015

ICF International is a US-based consulting company providing energy, environments, aviation, and other consulting services to clients worldwide.

- Led a consulting team (4 consultants) that identified 20% energy saving opportunities for industrial plants.

EDUCATION

Candidate Master of Applied Computing

July. 2023 - Dec. 2024 (expected)

Lincoln University, New Zealand

Graduate Diploma in Computing

Feb. 2018 – Dec. 2018

Unitec, New Zealand

Bachelor of Building Technology and Engineering

Sep. 2006 – Jul. 2010

Tongji University, China
