LANGUAGES

- Java
- JavaScript Frameworks (Vue, Angular, React)
- React Native
- C#
- Python
- JavaScript/HTML/CSS
- SQL
- RESTful API's

TOOLS

- Docker
- Copilot
- Git/Sourcetree
- LLM Integration
- RAG prompting
- Oracle (P-SQL)/MS-SQL Server (T-SQL)
- Azure

OTHER SKILLS

- Agile development
- Adaptable to new languages and tools
- Remote and hybrid team environment
- Coaching/mentorship of Junior Devs

PERSONAL SUMMARY

I'm a passionate Software Engineer with over 10 years experience in a variety of JavaScript frameworks, Java, SQL and Python. I'm always eager to learn and improve and consistently seek opportunities to leverage my expertise to advance my team and company objectives. My approach has always been, "Yes, we can do that! Let's find a solution."

Please check out my portfolio, you can find a Chatbot there which will answer any questions you have about me.

EXPERIENCE

Freelancing & Personal Projects

Sep 2024 - Present

Responsibilities:

- Develop applications in modern technologies and frameworks

Achievements:

- Developed a web / mobile app in React / React Native, now a functional app available on Google Play and on the website.
- Developed a Node.js Docker container and server backend. Leveraged modern security implementation including server-side session management

Technologies & Tools:

- Technologies: Node.js, Express, React.js, React Native, Docker, MySQL, Redis.

Software Engineer

May 2021 - Sep 2024

Straker - Auckland, New Zealand

Responsibilities:

- Rebuild Legacy monolithic applications into microservices using RESTful APIs and Vue.js in order to modernize features and functionality.

EDUCATION

- Elements of AI - University of Helsinki
- Building AI - Advanced (Python) - University of Helsinki

- Develop new or improve existing functionality to assist Product Owners with their goals.

Achievements:

- Redesigned existing Workflow Automation tool, patching bugs enabling the tool to work as designed. Resulting in over \$100,000 worth of workflows to be processed in three months without Project Manager intervention.
- Worked with CoPilot, enabling streamlining of development by assisting in AI training.
- Assisted in building custom LLMs for Straker's AI product in Python and Ollama. Allowing for improved automation using AI processes.

Technologies & Tools:

- Technologies: Cold Fusion, React.js, Angular.js, Vue.js, Docker, Copilot, Python, AI LLMs, Ollama, RAG Prompting, MySQL
- Assisted and coached junior developers
- Copilot

Freelancing & Personal Projects

Jun 2019 - April 2021

Responsibilities:

- Develop new applications

Achievements:

- Built a game in the Unity Engine, which had networking capabilities

Technologies & Tools:

- Technologies: C#, Socket.IO

Java Developer / Database Administrator

Jun 2014 - Jun 2019

One (prev. Vodafone) - Auckland, New Zealand

Responsibilities:

- Maintain and optimize data operations across various databases. Allowing for ease of operations and access to essential information.
- Develop tools or automated functions to assist Project Managers with access to information or to streamline processes.

Achievements:

- Developed a custom internal application to replace one going out of service. Allowing the team to continue essential operations and saving the company over \$100,000 per year in license fees for the proprietary application.
- Implemented an additional tool in MS SQL Server and Azure Cloud for a second team. Allowing them to maintain accurate data while working with their preferred MS applications.
- Built a multitude of customized tools, asset and transactional databases as needed by the wider teams in their data analytics needs.

Technologies & Tools:

- Technologies: Java, Web Development, HTML, CSS, JavaScript, jQuery, Oracle, MS SQL Server, Azure Cloud, SQL, NoSQL, Business Intelligence
