

LASNA KOLLATHODI

Position: Full Stack Developer

Remuneration: Seeking \$80k

Availability: 4 weeks

Working Rights: Yes

Candidate Summary:

Lasna presents as a strong full stack candidate with relevant experience aligned to BW Digital's technical requirements. She has over 3+ years of professional full-stack development experience, meeting and exceeding the role's requirement of 2–3 years, with a track record of delivering scalable, enterprise-grade applications across logistics, healthcare, and IoT domains.

Her technical stack aligns well with the role, particularly in frontend development (React, TypeScript, Angular) and backend development using C#/.NET and REST APIs, demonstrating solid full-stack capability, although her backend experience is primarily in .NET rather than Java/Spring Boot as specified. She has proven experience designing and integrating APIs, building real-time data-driven systems, and working with cloud-hosted environments (Azure), which is highly relevant to BW Digital's application landscape.

Lasna also demonstrates strong exposure to modern software engineering practices, including cloud deployment, cost optimisation, database design, and dashboard/reporting solutions. While she does not explicitly list ETL tools like Pentaho or DevOps tooling such as Docker/CI-CD, her Azure DevOps and cloud experience suggest transferable capability in these areas.

Importantly, she has experience working on operationally critical systems, implementing role-based access, telemetry integration, and performance optimisation—indicating good alignment with the role's focus on scalable, secure, and high-availability applications.

Overall, Lasna is a well-rounded full stack developer with strong frontend and .NET backend expertise, solid cloud exposure, and relevant enterprise delivery experience. She is a strong fit technically, with the key gap being direct Java/Spring Boot experience, but this may be offset by her breadth of full-stack capability and proven ability to adapt across technologies.

YOUR RECRUITMENT SPECIALIST

Consultant Name: Eloise Gantuangco
Title: Technology & Transformation Manager
Robert Walters
E: eloise.gantuangco@robertwalters.co.nz
M: 021 1457433

SUMMARY

Senior Software Engineer with strong development experience delivering logistics, healthcare, IIoT, reporting, and operational workflow systems. Skilled in React, TypeScript, Blazor Server, Angular, C#, .NET Core/.NET 8, SQL Server, and Azure-hosted applications. Experienced in building clean, scalable user interfaces integrated with real-time telemetry, geospatial routing, role-based workflows, REST APIs, and production databases. Recognized for improving operational visibility, reporting accuracy, workflow efficiency, and cost-aware cloud usage in enterprise environments.

EDUCATION

Present
Unitec Institute of Technology, Auckland, New Zealand
Master of Applied Technologies

Bharathiar University, Coimbatore, India
MBA in Human Resources

Cochin University of Science and Technology, Kerala, India
B.Tech in Electronics and Instrumentation Engineering

TECHNICAL SKILLS

- Frontend:
 - React, TypeScript, JavaScript, Angular, Blazor Server, Redux, React Query, HTML5, CSS3, SCSS, Tailwind CSS, MudBlazor
- Backend & APIs:
 - C#, .NET Core, .NET 8, ASP.NET, REST APIs, Entity Framework Core, Swagger
- Database & Reporting:
 - SQL Server, Azure SQL Database, PostgreSQL, MySQL, Cosmos DB, Power BI, Power Apps
- Cloud & DevOps:
 - Microsoft Azure, Azure Maps, Azure DevOps, Git, AWS S3
- Domain Strengths:
 - Logistics systems, freight monitoring, mail lodgement, telemetry integration, geospatial routing, dashboards, reporting, cost optimisation

CAREER HISTORY

JUN 2024 – PRESENT

DX MAIL, FREIGHTWAYS GROUP, AUCKLAND, NEW ZEALAND

System Analyst

- Primary technical contributor across enterprise logistics platforms supporting freight network monitoring, mail lodgment processing, billing workflows, and operational reporting.

Network Monitor (Parceline Express Limited)

- Developed and supported a real-time fleet monitoring platform for trucks and aircraft operating across scheduled freight routes.
- Built state-driven Blazor Server dashboards for live journey tracking, delay reporting, manual vehicle assignments, freight visibility, and operational monitoring.
- Integrated EROAD and Navman telemetry data, including GPS position, speed, ignition status, and geofence events, to improve real-time visibility.
- Integrated Azure Maps Routing API to display route geometry, distance, and ETA calculations within journey monitoring workflows.
- Contributed to .NET 8 background services for journey generation, vehicle state transitions, schedule reconciliation, and ETA calculation.
- Optimized frontend refresh cycles and API usage to improve dashboard responsiveness, reliability, and Azure cost efficiency.
- Applied cost-aware optimization through capped parallel API calls, adaptive polling intervals, vehicle-state filtering, and geospatial caching.

Technologies:

- Blazor Server, .NET 8, EF Core, Azure Maps, Azure SQL Database, EROAD API, Navman API, Azure DevOps

Lodgement Manager (DX Mail)

- Developed and enhanced modules supporting mail lodgment processing, billing automation, rate card configuration, and operational reporting.
- Built React and TypeScript frontend components integrated with .NET Core APIs and SQL Server-backed services.
- Developed clean, reusable UI components for lodgment workflows, customer management, branch configuration, product setup, and operational views.
- Improved workflow transparency and reporting accuracy by enhancing dashboards, filters, search functions, and data-driven operational screens.
- Contributed to role-based access control and configuration workflows across organization, branch, zone, customer, and product domains.
- Supported operational performance monitoring and issue investigation through improved data visibility, reporting outputs, and backend data validation.
- Integrated SendGrid-based automated email notifications to support operational workflows and user communication.

Technologies:

- React, TypeScript, .NET Core, C#, REST APIs, SQL Server, Azure, Entity Framework Core

JUL 2023 – FEB 2025

LINKWAY SOFTWARE SOLUTIONS, KERALA, INDIA

Software Developer (Freelance)

- Designed and developed mobile and web applications based on client business requirements.
- Published the Easy Stock Taker Android application to support inventory management and stock-taking workflows.
- Built user interfaces, reporting modules, and backend data integration features to support business users and operational teams.

Technologies:

- Flutter, SQLite, ASP.NET

FEB 2023 – JUN 2024

DX MAIL, FREIGHTWAYS GROUP, AUCKLAND, NEW ZEALAND

Database Support & Admin

- Developed Power BI dashboards and reporting outputs to provide KPI visibility for internal leadership.
- Supported operational reporting, data accuracy checks, compliance-related requests, and database support activities.
- Improved payroll reconciliation and internal workflow efficiency through better data preparation, validation, and reporting processes.

Technologies:

- Power BI, Power Apps, SQL, Excel

JUL 2021 – OCT 2022

HALZA SOFTWARE SOLUTION LLC, DUBAI, UAE

Frontend Developer

- Developed frontend features for a cloud-hosted digital healthcare platform, focusing on usability, performance, and responsive design.
- Implemented multilingual support, caching strategies, Progressive Web App features, and SignalR-based real-time functionality.
- Integrated Angular and React UI components with .NET Core APIs and Cosmos DB-backed services.
- Collaborated with UX and backend teams to deliver polished, user-friendly product features.

Technologies:

- Angular, React, SCSS, Cosmos DB, Azure, .NET Core, SignalR

JUN 2020 – JUN 2021

THREE PHASE TECHNO SOLUTION PVT LTD, KERALA, INDIA

Development Engineer

- Developed full-stack web applications within Agile delivery teams.
- Built responsive UI systems and custom React/D3 visualization components for operational dashboards.
- Contributed to the DAVAS UI IIoT platform, supporting device management, telemetry visualizations, and monitoring workflows.

Introductions of candidates by Robert Walters (using any manner of communication) are governed by the terms and conditions of the contract between Robert Walters and its Client (or if none by Robert Walters Terms and Conditions).

- Developed CRM modules for field surveys, quotations, reporting, and business process tracking.

Technologies:

- React, Angular, Node.js, PostgreSQL, D3, Tailwind CSS, Grafana, AWS S3

SEP 2014 – DEC 2016

BABTE TECHNOLOGIES PVT LTD, KERALA, INDIA

Junior Web Developer

- Built responsive web interfaces using HTML5, CSS3, JavaScript, jQuery, and Ajax.
- Developed ASP.NET WebForms and MVC applications with C# and MySQL backend integration.
- Supported API-driven page development, bug fixing, testing, and application maintenance.

Technologies:

- ASP.NET WebForms, ASP.NET MVC, C#, MySQL, JavaScript, jQuery
