PROFESSIONAL SUMMARY:

I am a passionate coder, a fantastic troubleshooter, and an enthusiastic Software Engineer with a strong track record of developing, implementing, and testing software to meet specific project requirements. I have extensive experience developing software solutions to meet business requirements. I work with cutting-edge technologies across a variety of fields, with a keen interest in shaping the future of software applications and solutions. As a true professional, I am dedicated to my self-development and enjoy working closely with others, with an eye for detail and a knack for identifying problems. With a background in computer hardware, software, applications, and programming, I can function effectively in an environment which is constantly evolving due to technological advances. On a personal level, I have strong listening skills that enable me to understand and capture a user's exact requirements.

I am seeking a position with a company that places strong emphasis on employee growth and development.

AREAS OF EXPERTISE INCLUDE:

- The implementation of MVC using frameworks such as Spring MVC, Spring Boot, ASP.NET MVC, .NET CORE.
- Programming languages include JAVA, C#, Python, C++, and SQL.
- Full-stack technologies like MEAN (MongoDB, ExpressJS, AngularJS, and NodeJS).
- JSP, Servlets, HTML, CSS, Angular, ReactJS, JavaScript to create web interfaces.
- Java Beans and used custom tag libraries.
- Various IDEs like NetBeans, Eclipse, IntelliJ IDEA, Visual Studio, Visual Studio Code, and Android Studio.
- Open-source technologies such as Apache.
- SOAP API, RESTful API, WEB API, and XML for developing web services.
- Source control tools such as Git, SVN, and CVS.
- JavaScript, React Native, Redux, AngularJS- CLI, AJAX, HTML5, jQuery, Bootstrap, Font Awesome, Android SDK, and Emulator.
- Web Development Tools: Web API, Firebase, Tomcat, GlassFish, Jenkins, Docker and Kubernetes.
- Agile methodologies such as extreme programming XP, Scrum and Test-Driven Development.
- ORM such as Entity Framework and Hibernate

SKILLS COMPETENCY:

SOFT SKILLS:

- Strong training and advisory skills with the ability to direct stakeholders in implementation and use of new systems and programmes.
- Highly developed analytical skills and an aptitude for innovative solution building.
- Extensive experience in designing, implementing, improving, and maintaining strategies to meet organisational needs.
- Strong communication and interpersonal skills.
- Ability to work collaboratively with cross-functional teams and diverse stakeholders.
- Stress-tolerant who can cope well under pressure and confident in planning and reaching set goals and deadlines.
- Ability to work in a team and follow instructions well.

HARD SKILLS:

- Exceptional computer system analysis and design skills in current methodologies.
- Exceptional problem solving and algorithmic skills.
- Stays abreast of new technologies.
- Experience with the administrative requirements involved with software projects.
- Maintained existing applications and designed and delivered new applications.
- Performs root cause analysis on software problems.
- Programming languages include SQL, Java, C#, Python and C++.
- Experience in Agile methodologies such as Extreme programming XP, Scrum and Test-Driven Development.
- Clean Architecture, SOLID Principle

EDUCATION AND QUALIFICATIONS:

- 2026 **Master of Science (Computing)**, University of South Africa
- 2022 **Bachelor of Science Honours (Computing)**, University of South Africa
- 2019 **Bachelor of Science (Computing)**, University of South Africa
- 2011 **National Certificate (Computer Science/ Physics)** – NQF 6, Emmanuel Alayande College of Education – Nigeria
- 2005 **West African Senior School Certificate (WASSCE)**, Baptist Secondary Grammar School

PROFESSIONAL COURSES:

- | | |
|--|--|
| <ul style="list-style-type: none">• Machine Learning with Python (IBM) – 2020.• Python for Data Science (IBM) – 2019.• Developing ASP.NET MVC Web Applications – 2017. | <ul style="list-style-type: none">• Data Science Foundation’s 2 (IBM) – 2016.• Data Science Foundation’s 1 (IBM) – 2016.• Microsoft Specialist: Programming in C# – 2015.• Microsoft Certified Professional – 2015. |

Software Developer (November 2018 – Dec 2022)
Molken Resources

Molken Resources is the sole agent for B&Y A6 and B&Y A6S in Southern Africa. Their services include web applications, mobile development, and enterprise solutions. Their team of experts works collaboratively, using the best methods and tools to deliver the best software solution. **Main responsibilities:**

- Writing, modifying, debugging, and implementing efficient code.
- Determining operational practicality.
- Deploying software tools, processes, and metrics.
- Maintaining and upgrading existing systems.
- Working closely with other developers, UX designers, business, and systems analysts.
- Responsible for developing solutions that are flexible, extensible, and efficient.
- Working with frameworks and libraries like Angular 2, and ReactJS.
- Coding in Java, C#, jQuery, Node.js, AngularJS, Express JS, MongoDB, AWS, Azure, Docker and so on.
- Developing and demonstrating a broad set of technology skills in Java technologies, micro service design patterns, Open-Source libraries and frameworks, and technology architecture concepts.
- Training users.
- Work with web technologies, Angular preferable (Web development JavaScript Frameworks), Flutter Android/ IOS/ Web, .Net Core & Azure Cloud.
- component test execution to demonstrate alignment to the functional specification.
- Using configuration management and integration/build automation tools to lead and deploy Java code.
- Applying knowledge of common, relevant architecture frameworks in defining and evaluating application architectures.
- Performing code reviews and providing critical suggestions for fixes and improvements.
- Supporting issue analysis and fix activities during test phases, as well as production issue resolution.
- Fixing and performance tuning Java-based applications.

Junior Software Developer (July 2016 – November 2017)

Elizadave Marketing & Projects Pty Ltd

This is a privately owned marketing company. **Main responsibilities:**

- Writing and debugging code.
- Troubleshooting software issues.
- Working closely with developers to improve product's functionality.
- Developing innovative solutions.
- Attended regular meetings.
- Participated in code reviews and quality assurance activities.
- Adhoc duties as requested.

Information Technology Technician/ Developer (February 2015 – June 2016)

W.G.F Trading and Projects 16 CC

This is a privately owned company specialising in. **Main responsibilities:**

- System support.
- Troubleshooting network issues.
- Working closely with clients to improve product's functionality.
- Development testing of solutions.
- Attended regular meetings.
- Participated in code reviews and quality assurance activities.
- Participate in roll-outs/go-live activities.
- The Microsoft development technology stack
- System maintenance and defects resolution

NOTEWORTHY PROJECTS:

<u>PROJECT NAME:</u>	<u>OVERVIEW:</u>	<u>DURATION:</u>	<u>Programming Language/ Software:</u>
SAPO – FICA Verification	The enterprise application was upgraded to perform multiple tasks by different departments, SASSA, FICA, Historical and Index.	July 2016 – March 2017	JAVA, Spring MVC, Hibernate, JDBC, Oracle 11g, JSP, jQuery, RESTful, Ajax
SAPO – Reunpaid	Computing unpaid redirect files and decoding it to translate into an end user readable format.	April 2017 – November 2017	JAVA, Java Swing, JDBC, Oracle 11g, JSP, jQuery
Opiscol – Diesel Management System	The system was designed to keep track of the consumption of diesel by each truck, generate reports and alert the staff should	January 2019 – July 2019	JAVA, Spring Boot, MongoDB, Thymeleaf, jQuery, RESTful

	the level of diesel in stock decrease beyond the set limit		
TUT (Industrial Engineering Department) – CIRP System	Developed a web application and mobile application that will consume the data from the meter and make it available online for analytical purposes.	August 2019 – May 2021	AngularJs, NodeJS, Express, MangoDB, Mongoose, React Native, ReactJs, Typescript, Web API
Safuma Loan Application	The system was designed to manage clients loan application, managing loan request, approval, repayment, due date triggers and others	May 2021- Nov 2022	ReactJs, .NET Core, Typescript, Web API, SQL Server, Javascript, Azure, Html, CSS, Entity Framework
Wesis Clothing Ecommerce Web Application	Develop an ecommerce web application for online shopping	August 2023- July 2024	C#. NET Core, Entity Framework, Identity, SQL, Web API Azure, Visual Studio, CSS, Html,
Farm management System	Development of an enterprise application to manage complete farm activities, recording animal health, manage feed production and crop harvest	September 2024 – August 2025	C#.NET Core, Entity Framework, SQL, Identity, ReactJs, CSS, Typescript, Vite and Html, Web API

PUBLICATION:

The perception of the fourth industrial revolution on healthcare skilled jobs among occupational therapists
(International Journal of Communication Networks and Information)

2025

HOBBIES AND INTERESTS:

Outside of work, I enjoy playing competitive sports such as soccer and tennis. My interests include reading historical books and exploratory studies as well as travelling to new places.
