

RESHITHA RAVI

Auckland, New Zealand | +64 21 979 365 | ravireshitha@gmail.com | linkedin.com/in/reshitha

PROFESSIONAL SUMMARY

Results-driven software engineer with 7+ years of experience delivering full-stack enterprise solutions across banking and fintech domains. Proven expertise in Java, Spring Boot, and Angular, with hands-on experience designing RESTful APIs, building frontend components, and integrating relational databases. Adept at collaborating with product owners and cross-functional teams to translate business requirements into scalable, maintainable software. Holds valid NZ work visa.

TECHNICAL SKILLS

Backend	Java, Spring Boot, Microservices, REST APIs, RESTful API Design
Frontend	Angular, HTML, CSS, XML, JSON
Databases	MySQL, Oracle DB, SQL
Data / ETL	ETL concepts, Oracle Data Integrator
API / Integration	Postman, SOAP UI
DevOps / Tools	Jenkins (CI/CD), Docker, Git, JUnit, SonarQube, JIRA, Maven
Certifications	Microsoft C#/.NET Google Generative AI Claude Code in Action

PROFESSIONAL EXPERIENCE

Staff Consultant – Software Engineering | Oracle Financial Services 2022 – 2025 | India

- Developed and maintained production Java/Spring Boot microservices for banking workflows, ensuring high reliability and scalability across distributed systems.
- Built and enhanced Angular frontend modules and UI components, improving usability and responsiveness of the customer portal.
- Designed and maintained RESTful APIs with robust input validation, error handling, and Oracle DB integration.
- Led BACS File Processing Optimization project — redesigned payment file workflow using Java parallel and async processing, significantly reducing processing time and improving scalability.
- Collaborated with product owners and senior architects to translate business requirements into effective technical solutions.
- Participated in peer code reviews, enforcing coding standards and architectural guidelines across the team.
- Worked with CI/CD pipelines (Jenkins, Docker, Git) to ensure smooth deployment and continuous integration practices.

Senior Systems Engineer | Infosys 2019 – 2022 | India

- Delivered full-stack Java and Spring Boot solutions for fintech clients, covering REST API development and relational database integration (MySQL).
- Developed Angular components and contributed to frontend enhancements that improved end-user experience for financial services portals.
- Designed and executed data integration processes supporting reporting and analytics needs.
- Applied SonarQube and JUnit-based testing practices to maintain code quality and reduce defect rates.
- Contributed to Finacle (Infosys core banking product) customisation and enhancement projects, gaining deep domain expertise in banking data flows.

Software Developer | Temenos

2018 – 2019 | India

- Developed backend Java modules and REST APIs supporting core banking operations within the Temenos T24 ecosystem.
- Wrote SQL queries and maintained relational database schemas; worked closely with data teams to ensure data accuracy and integrity.
- Gained foundational experience in enterprise application lifecycle, from requirements through deployment.

KEY PROJECTS

BACS File Processing Optimization

- Redesigned the end-to-end payment file processing workflow using Java parallel and asynchronous processing techniques.
- Delivered measurable improvements in processing throughput and system scalability, reducing bottlenecks in high-volume banking operations.

Data Mining Academics Recommendation System (Published Research – IJRASET)

- Co-authored and published research on enhancing student employability through data mining of academic and event performance data.

EDUCATION

B.E. in Computer Science Engineering

2014 – 2018

National Institute of Engineering, Mysore, India

COMMUNITY & VOLUNTEERING

Volunteer – Interact Disability Arts Festival, Auckland | Active member – Auckland Tamil Association
