

Sandaru Vishwajith

Software Engineer – Java / Spring Boot (Backend)

Auckland, New Zealand

022 622 0915 | sandaruviswajith@outlook.com | vishwajith.xyz | linkedin.com/in/vishwajithsandaru

Profile Summary

Senior Software Engineer with 5+ years of experience designing and delivering scalable **Java** and **Spring Boot** backend systems across fintech and healthcare domains. Proven production impact, including a **45%** reduction in **p95 API latency** and reliable support for **2× traffic** growth without service degradation. Strong expertise in **microservices** and **event-driven architectures**, with hands-on cloud-native delivery on **AWS** and **GCP** using **Kubernetes**, and ownership of production-grade **CI/CD** pipelines.

Professional Experience

NEW ZEALAND BUSINESS ASSOCIATION | AUCKLAND, NEW ZEALAND

03/2025 – PRESENT

Software Engineer

- Develop backend **REST APIs** supporting business-critical workflows, improving response times by ~25%
- Build and maintain **Angular** based web interfaces as part of end-to-end feature delivery
- Collaborate within **Agile** teams to deliver full-stack features while maintaining code quality and best practices

INNOBOT HEALTH | CAPE CORAL, FL, USA

05/2024 – 12/2024

Senior Software Engineer

- Designed and developed an in-house **distributed framework** for automating healthcare revenue cycle management (RCM) processes
- Led a team of 5 developers** to build the framework and automate appeal packet creation and claim status tracking workflows
- Implemented a **full CI/CD workflow**, automating build, test, and deployment pipelines, increasing development and release efficiency by ~50%
- Introduced caching** for frequently accessed reference data to reduce database load and **improve p95 latency**
- Optimized query performance** through effective database indexing
- Utilized **AI-driven automation techniques** to enhance healthcare RCM processes, reducing manual effort and improving workflow efficiency
- Identified and analyzed existing processes, and designed a generalized approach that drove process improvement and alignment with the framework

IPAY GLOBAL | COLOMBO, SRI LANKA

01/2020 – 04/2024

Software Engineer (Progressed from trainee → associate)

- Improved API stability** and reduced **p95 latency** by 45% by tuning database connection pooling and **Kubernetes** autoscaling, eliminating timeout incidents while supporting **2× traffic growth**
- Upgraded legacy Spring MVC applications to Spring Boot**, simplifying configuration and deployment
- Optimized Spring Boot startup performance** by trimming auto-configuration and enabling lazy bean initialization, cutting startup time by 30%
- Fixed N+1 query issues** in **JPA** by using fetch joins/entity graphs and adjusting lazy/eager loading strategies

- **Improved backend execution efficiency** by ~15–20% by revising **data structure** choices and optimizing in-memory computation paths
- Architected the Rewards and Campaign modules of the iPay platform
- Designed and developed **100+ REST APIs** and **event-driven microservices** using **Java**, **Spring Boot**, and **Apache Kafka** within a **microservices architecture**
- Integrated with legacy banking systems using **SOAP** based web services through **WSO2 Enterprise Service Bus (ESB)**
- Implemented **unit and integration tests** using **JUnit** and **Mockito** to support **test-driven development** and ensure reliability
- **Designed and implemented CI pipelines** using **Jenkins**, integrating **SonarQube** to enforce automated code quality, security checks, and quality gates
- **Implemented GitOps-based continuous deployments** using **Argo CD** to automate and manage **Kubernetes** application deployments
- Created **Grafana dashboards** for monitoring application performance and **Kubernetes** workloads
- **Mentored junior developers and interns**, providing technical guidance and promoting engineering best practices

Technical Skills

Backend & APIs: **Java**, **Spring Boot**, **Spring MVC**, **Spring Data JPA**, **Hibernate**, **RESTful APIs**, **SOAP**, **Maven**, **Gradle**, **Apache Tomcat**, **Microservices**

Cloud & DevOps: **Docker**, **Kubernetes**, **Jenkins**, **Argo CD**, **GitHub Actions**, **AWS**, **Google Cloud Platform (GCP)**, **Terraform**

Databases & Messaging: **MySQL**, **PostgreSQL**, **SQL**, **PL/SQL**, **Redis**, **Apache Kafka**

Frontend: **React**, **Angular**, **TypeScript**, **JavaScript**, **HTML5**, **Tailwind CSS**

Practices & Tools: **Agile / Scrum**, **Test-Driven Development (TDD)**, **Code Reviews**, **Git**, **Jira**, **Confluence**, **Postman**

Education

UNIVERSITY OF WESTMINSTER | LONDON, UNITED KINGDOM

09/2019 – 06/2024

B.Eng. (Hons) Software Engineering, First Class
