

Candidate Profile of Samitha Chathuranga for the role of Full Stack Developer

Samitha presented well at our interview and came across as friendly and professional. He is a skilled software development practitioner with career experience in Sri Lanka and in New Zealand. His English language comprehension is good and he listened well and provided detailed answers to my questions.

Samitha is originally from Sri Lanka and moved to Auckland last year with his wife. Currently he has a 3 year work visa, and has plans to secure permanent residency and stay in New Zealand for the long term.

He is a seasoned software development professional with extensive specialist experience in Java development, API engineering, full-stack development, and enterprise-grade integration. His background includes deep technical work with Java, Spring Boot, and the design and implementation of high-performance backend services and REST APIs.

In his current role as a Full Stack Engineer at MyRepsoft www.myrepsoft.com in Auckland he works with Angular /Typescript on the frontend and Python mainly on the backend. His Angular work involves developing and integrating UI components with backend APIs and supporting workflow-related screens as part of end-to-end feature delivery.

He has spent a large part of his career with WSO2 in Sri Lanka [WSO2 | Open by Design. Intelligent by Nature.](#) Their his main focus was Java / Spring Boot, backend development, and integration work and he also developed JavaScript-based frontend applications. In the earlier years, he worked with JaggeryJS (JavaScript based framework), and later with React-based frontend applications as WSO2 moved towards React. His front end work included feature development, bug fixing, frontend-backend integration, and UI/UX customisations.

Salary expectations: \$100,000 per annum

Notice period: 4 weeks

Samitha Chathuranga

Member of IT Professionals NZ

VISA STATUS: New Zealand 3 year work visa

SUMMARY

Results-driven Software Engineer with over 10 years of experience in full stack software development focussed mainly on Java, API development and middleware technologies. Proven expertise in designing and developing scalable, high-performance solutions with a strong focus on security, distributed computing, and cloud-native functionality.

PORTFOLIO OVERVIEW

10+ years of professional expertise in Java development and related backend technologies, with full-stack development experience with JavaScript, React, Angular, Python, SQL and familiarity with CI/CD, automation.

Expertise in designing, developing, & optimizing distributed API gateways, with cloud-native attributes and concerns on data replication, high availability & reliability.

Expertise in middleware software development, middleware integration, API management (APIM), RESTful API Development, SOA, specializing in high-performing, scalable, and secure solutions.

Global consultancy and work experience, leading API/integration solutions for enterprise clients, including onsite engagements in Switzerland and the USA.

Recognized industry contributor, with IEEE research publications, public webinars, articles and awards, and open source contributions.

SKILLS

- **Programming Languages :**
 - Java: Java EE, Spring Boot, Hibernate, JAXRS
 - Other: JavaScript, React, Angular, Python, Go Lang, C, C++, Shell/bat, PHP
- **Testing / Automation & Observability:** JUnit, TestNG, Unit/Integration testing, TDD, JMeter, SOAP UI, Performance analysis, JMap, JStack, JFR, Heap dump analysis, Log4j, ELK Stack
- **Containerization:** Choreo Cloud, Kubernetes, Docker
- **Protocols /Frameworks / Concepts:** OAuth2, API Keys, Mutual SSL, REST, SOAP, OpenAPI, Websocket, GraphQL, Event Driven Architecture (EDA), Message Brokering, JMS/ActiveMQ, Micro gateway, Workflow (BPMN, BPEL) Synapse, Message mediation, JWT, SPA, Log4j, Observability, Microservices
- **DB:** MySQL, MS SQL, PostgreSQL, Oracle
- **CI/CD, Version Control & DevOps :** Git, SVN, Jenkins, GitHub Actions, Ansible, Puppet
- **Security :** NVD, CVE, OWASP, Security scan report analysis, Data encryption, API Threat protection
- **Other :** Ethereum Blockchains, Maven, Tomcat, Jira, Confluence, MkDocs, Agile development

WORK EXPERIENCE

FULL STACK SOFTWARE ENGINEER - (MyRepsoft Limited – Auckland, NZ)

2025-11 – Present (3 month rolling contract)

- Design and develop full-stack features for an Accounts Payable automation platform with a focus on scalable API-driven business workflows.
- Effectively leverage AI-assisted development tools to accelerate feature design, implementation, code quality improvement, debugging, and enhancing productivity across feature delivery activities.
- Own major accounting statements reconciliation feature delivery, covering document extraction integration, ERP data matching, post-processing, result persistence, real-time progress tracking, and consolidated Excel report generation.
- Integrate frontend web workflows with asynchronous backend services through REST APIs and real-time notification mechanisms such as SignalR / SSE.
- Support deployment and release readiness using Docker, production configuration updates, environment alignment, integration testing, and service packaging.
- Lead feature delivery through design discussions, code reviews, implementation reviews, quality validation, and ownership of maintainable, release-ready solutions.

ASSOCIATE TECHNICAL LEAD III - (WSO2 INC - Colombo, Sri Lanka)

2024-02 - 2025-03

- Providing technical leadership and guidance at design reviews, code reviews.
- Improving API error handling mechanisms of REST API implementations.
- Observability improvements Implementing the feature to generate Web Socket API Access logs.
- Implementing proxy support for OAuth Endpoint security in API Manager (APIM) REST APIs.
- Developing complex, high load-consuming integrations for a large scale enterprise platform, which included REST/SOAP API implementations.
- Mentoring intern software engineer for the project on Throttle Policy Reset Support for the APIM product.

ASSOCIATE TECHNICAL LEAD - (WSO2 INC - Colombo, Sri Lanka)

2020-01 - 2024-01

- Designed and implemented backend and burst related distributed throttling solution for the API Management, utilizing a sync-async hybrid model with Redis cache leveraging pub/sub model and eventing mechanisms to enable rate limiting for API gateways processing thousands of requests per second.
- Technical Release Manager of release of APIM product leading the team.
- Leading the effort of importing/exporting throttling policies with a CLI tool with GoLang, Java
- Leading the effort of implementing the system data migration client and testing/finalizing the in-detail migration process.
- Leading the teams of APIM product related technological consultancy provided for WSO2 customer support team and WSO2 clients and Leading WSO2 APIM 4.1.0 bug fixing, testing team
- Password change feature for self-signup users of the ReactJS based web app
- Conducting Public webinars on Multi-Regional API Management on rate limiting and analytics

- Leveraged growth hacking strategies to drive user engagement and adoption of the Choreo cloud platform using VWO
- Security vulnerability scan report analysis and bug fixing considering OWASP with CVE/NVD
- Configuring and managing CI/CD pipelines with Jenkins and GitHub actions.

SENIOR SOFTWARE ENGINEER - (WSO2 INC - Colombo, Sri Lanka)

2018-05 - 2020-01

- Implementations for data migration of the APIM product written on old core platform to newer platform via features added to CLI tool written in Golang
- Implementing the validation of role-based permissions within the ReactJS based WSO2 APIM Publisher Portal to strengthen access control mechanisms.
- Technical Release Manager for the major version release of WSO2 APIM 3.0.0
- Defining and implementing test cases/scenarios with TestNG, JUnit
- Continuous product improvements/bug fixes
- Providing technical support to fix issues in customers' middleware based production deployments

SENIOR ENGINEER - (Suva-Swiss National Accident Insurance Fund - Luzern, Switzerland)

2019-04 - 2019-05

- Working as a 'Consulting Technology Area Specialist - Senior Engineer' on contract basis via WSO2, deploying the distributed setup of APIM, ESB and Analytics Servers under a revamped deployment pattern, including their customizations and configuring new features.
- Migration of high-volume system data and artifacts to align with new product version requirements.

SENIOR ENGINEER - (Fidelity Investments - North Carolina, United States)

2018-03 - 2018-04

- Working as a 'Consulting Product Specialist – Senior Engineer' on contract basis via WSO2, performing the system data migration of the APIM, ESB, Data Analytics Server deployment.
- Deployment of the above products in a revamped architecture with custom Java extension implementations.

SOFTWARE ENGINEER - (WSO2 INC - Colombo, Sri Lanka)

2016-01 - 2018-05

- Designed, developed, and fixed software product features to enhance functionality and ensure reliability.
- Conducted research and development for WSO2 Process Center, Business Process Server, and APIM to optimize product capabilities.
- Developed Puppet modules for configuration management (SCM) and CI/CD to streamline deployment processes APIM product.
- Implemented process variable analysis support in a business process management system, integrating with a process execution engine and a data analytics platform.

EDUCATION

Master of Computer Science - (University of Colombo School of Computing)

2018 – 2020

- Final Year Research: "Ensuring Data Integrity and Immutability of Audit History Critical Systems using Blockchains"

Bachelor of Science (B.Sc.) (Hons) in Information Technology - (University of Moratuwa)
2011 – 2015

CERTIFICATIONS / AWARDS

Oracle Certified Professional, Java SE 6 Programmer – June 2011

- Certificate Link : <https://www.youracclaim.com/badges/c1230abb-94e1-4d01-a595-14601235f0bb>

- **“Corporate Award” at the 2024 WSO2 Annual Awards Ceremony**
- For the exceptional contribution on Mule to WSO2 replacement integration project

WSO2 Certified API Manager 2 Developer – Professional

- Certification ID : R137ZL (Validate at <https://certification.wso2.com>)

- **Ranked 703 Worldwide from IEEE Extreme 8.0**
- IEEE Extreme Programming Competition 8.0 · Jan 2014

WSO2 Rockstar - Winner of May 2021

- Reward program for devs who excel in creating content on WSO2 products/best practices
